Deirdre Stewart	112.00		
Chaia Patacsil	110.00		
Mark O'Donnell	112.00		
Total	444.00		

Rules:

The absolute difference between the estimated time of each runner and the actual time of that runner is calculated.

The differences of the team members are added to get the total.

The total is divided by the number of runners in the team to get the average.

The team with the lowest average is the winner.

For instance, if all 4 members of a team estimate a time of 100 minutes and they run 95, 106, 97 and 90, the average difference for the team is $(5 + 6 + 3 + 10) / 4 = 6$ minutes.

People not finishing (or starting) the run or not members of Woodstock Runners are not eligible for prizes. Their times are not counted and the times of the remaining team members are used.

If a timing chip is used in the event, this time is used rather than the 'gun' time.
